**DYNAMIC ASPECTS
OF MICROTUBULE BIOLOGY^a**

Editor and Conference Chairman
DAVID SOIFER

Organizing Committee
B.R. BRINKLEY and LESLIE WILSON

CONTENTS

Preface. By DAVID SOIFER	xiii
Factors Regulating the Presence of Microtubules in Cells. By D. SOIFER.....	1
 Part I. Expression of Tubulin Genes	
Evolutionary Aspects of Tubulin Structure. By M. LITTLE, G. KRÄMMER, M. SINGHOFFER-WOWRA, and R. F. LUDUENA.....	8
Genetic and Functional Analysis of Beta Tubulin in <i>Aspergillus nidulans</i> . By N. R. MORRIS, G. S. MAY, J. A. WEATHERBEE, M. L-S. TSANG, and J. GAMBINO.....	13
<i>Chlamydomonas reinhardtii</i> Tubulin Gene Structure. By C. D. SILFLOW and J. YOUNGBLOM	18
Isolation and Characterization of Two Rat Alpha-Tubulin Isotypes. By I. GINZBURG, A. TEICHMAN, and U. Z. LITTAUER.....	31
Differential Expression of the β -Tubulin Multigene Family during Rat Brain Development. By S. R. FARMER, G. S. ROBINSON, D. MBANGKOLLO, J. F. BOND, G. B. KNIGHT, M. J. FENTON, and E. M. BERKOWITZ	41
Quantitation and <i>in Situ</i> Localization of Tubulin mRNA in the Mammalian Nervous System. By M. R. MORRISON and W. S. T. GRIFFIN.....	51
Reconstruction of Tubulin Gene Regulation in Cultured Mammalian Cells. By J. T. Y. LAU, M. F. PITTENGER, J. C. HAVERCROFT, and D. W. CLEVELAND	75
<i>In Vitro</i> Studies of the Biosynthesis of Brain Tubulin on Membranes. By J. M. GILBERT and P. STROCCHI.....	89

^aThis volume is the result of a conference entitled Conference on Dynamic Aspects of Microtubule Biology, held in New York City on December 3-6, 1984, by the New York Academy of Sciences.

Tubulin Variants Exhibit Different Assembly Properties. <i>By</i> S. W. ROTHWELL, W. A. GRASSER, and D. B. MURPHY	103
Biochemical and Chemical Properties of Tubulin Subspecies. <i>By</i> J. C. LEE, D. J. FIELD, H. J. GEORGE, and J. HEAD	111
Changes in Tubulin mRNAs during Differentiation of a Parasitic Protozoan <i>Leishmania mexicana</i> . <i>By</i> D. FONG and K-P. CHANG	129
Tubulin Heterogeneity in the Ciliate, <i>Tetrahymena thermophila</i> . <i>By</i> K. A. SUPRENANT, E. HAYS, E. LECLUYSE, and W. L. DENTLER	132

Part II. Microtubule-Associated Proteins

Differential Structure and Distribution of the High Molecular Weight Brain Microtubule-Associated Proteins, MAP-1 and MAP-2. <i>By</i> R. B. VALLEE, G. S. BLOOM, and F. C. LUCA	134
Differential Localization of MAP-2 and Tau in Mammalian Neurons <i>in Situ</i> . <i>By</i> L. I. BINDER, A. FRANKFURTER, and L. I. REBHUN	145
Microtubule-Associated Proteins in the Developing Brain. <i>By</i> A. MATUS and B. RIEDERER	167
Molecular Aspects of MAP-1 and MAP-2: Microheterogeneity, <i>in Vitro</i> Localization and Distribution in Neuronal and Nonneuronal Cells. <i>By</i> G. WICHE, H. HERRMANN, J. M. DALTON, R. FOISNER, F. E. LEICHTFRIED, H. LASSMANN, C. KOSZKA, and E. BRIONES	180
Axonal Transport of Microtubule Proteins: Cytotypic Variation of Tubulin and MAPs in Neurons. <i>By</i> S. T. BRADY and M. M. BLACK	199
The Binding of MAP-2 and Tau on Brain Microtubules <i>in Vitro</i> : Implications for Microtubule Structure. <i>By</i> H. KIM, C. G. JENSEN, and L. I. REBHUN....	218
Tau Microheterogeneity: An Immunological Approach with Monoclonal Antibodies. <i>By</i> A. FELLOUS, R. OHAYON, J-C. MAZIE, F. ROSA, R. F. LUDUENA, and V. PRASAD	240
Association of Tau Protein with Microtubules in Living Cells. <i>By</i> D. DRUBIN, S. KOBAYASHI, and M. KIRSCHNER	257
Dynein as a Microtubule-Associated Protein. <i>By</i> P. SATIR and J. AVOLIO	269
Dynein-like Cytoplasmic Microtubule Translocators. <i>By</i> D. J. ASAI, R. J. LESLIE, and L. WILSON	275
Distribution of MAP-4 in Cells and in Adult and Developing Mouse Tissues. <i>By</i> J. B. OLMSTED, C. F. ASNES, L. M. PARYSEK, H. D. LYON, and G. M. KIDDER	292
Sliding of STOP Proteins on Microtubules: A Model System for Diffusion-Dependent Microtubule Motility. <i>By</i> R. L. MARGOLIS, D. JOB, M. PABION, and C. T. RAUCH	306
What Might MAPs Do? Results of an <i>in Situ</i> Analysis. <i>By</i> F. SOLOMON	322
Isolation of Mitotic Microtubule-Associated Proteins from Sea Urchin Eggs. <i>By</i> G. S. BLOOM, F. C. LUCA, C. A. COLLINS, and R. B. VALLEE	328
Modulation of the Kinetic Parameters of Microtubule Assembly by MAP-2 Phosphorylation, the GTP/GDP Occupancy of Oligomers, and the Tubulin Tyrosylation Status. <i>By</i> R. G. BURNS and K. ISLAM	340

Association of Calcium/Calmodulin-Dependent Kinase with Cytoskeletal Preparations: Phosphorylation of Tubulin, Neurofilament, and Microtubule-Associated Proteins. By M. L. VALLANO, J. R. GOLDENRING, R. S. LASHER, and R. J. DELORENZO	357
Calcium and Calmodulin in the Regulation of the Microtubular Cytoskeleton. By C. H. KEITH, A. S. BAJER, R. RATAN, F. R. MAXFIELD, and M. L. SHELANSKI	375
The Calcium Sensitivity of MAP-2 and Tau Microtubules in the Presence of Calmodulin. By P. K. BENDER and L. I. REBHUN	392
Microtubule-Associated Proteins: <i>In Vitro</i> Isolation Versus <i>In Vivo</i> Function. By D. J. ASAI, W. C. THOMPSON, D. L. PURICH, and L. WILSON	410
Protein-Protein Interactions in Microtubules as Determined by Reversible Protein Cross-Linking. By R. D. SLOBODA and D. GOTTFELD	413
A Technique for Analyzing the Spatial Organization of Microtubular Arms and Bridges (MAPs). By C. G. JENSEN and B. H. SMAILL	417
Age-Related Modifications of MAP-2. By K. S. KOSIK, S. BAKALIS, L. GALIBERT, D. J. SELKOE, and L. K. DUFFY	420
Estramustine Phosphate Inhibits Microtubule Assembly by Binding to the Microtubule-Associated Proteins. By M. WALLIN, J. DEINUM, and B. HARTLEY-ASP	423
<i>In Vivo</i> Taxol Treatment Alters the Solubility Properties of Microtubule-Associated Proteins (MAPs) of Cultured Neurons. By M. M. BLACK and I. PENG	426
Retinoic Acid Induces MAP-2-Containing Neurites in Mouse Neuroblastoma Cells. By I. FISCHER, T. B. SHEA, K. S. KOSIK, and V. S. SAPIRSTEIN	429
Studies on Sea Urchin Egg Cytoplasmic ATPases of Possible Significance for Microtubule Functions. By A. S. DINENBERG, J. R. MCINTOSH, and J. M. SCHOLEY	431
Presumptive MAPs and "Cold-Stable" Microtubules from Antarctic Marine Poikilotherms. By R. C. WILLIAMS JR. and H. W. DETRICH III	436
Microtubule-Associated Proteins (MAPs) of Dogfish Brain and Squid Optic Ganglia. By G. M. LANGFORD, E. WILLIAMS, and D. PETERKIN	440
Proteins Associated with an Erythrocyte Marginal Band. By J. A. JOSEPH-SILVERSTEIN and W. D. COHEN	444
Comparison of Cytoplasmic and Flagellar Dynein by One-Dimensional Peptide Mapping. By M. M. PRATT	447
Interaction of the Regulatory Subunit (R_{II}) of cAMP-Dependent Protein Kinase with Tissue-Specific Binding Proteins Including Microtubule-Associated Proteins. By S. M. LOHMANN, U. WALTER, and P. DECAMILLI	449
Separation of Microtubule-Associated cAMP and Calmodulin-Dependent Kinases That Phosphorylate MAP-2. By M. L. VALLANO and R. J. DELORENZO	453
Phosphorylation of MAP-2 at Distinct Sites by Calmodulin- and Cyclic AMP-Dependent Kinases. By J. R. GOLDENRING and R. J. DELORENZO	457

Part III. Properties of Tubulins and the Assembly and Disassembly of Microtubules

Promotion of Tubulin Assembly by Carboxyterminal Charge Reduction. <i>By</i> D. L. SACKETT, B. BHATTACHARYA, and J. WOLFF.....	460
The Role of Lys 394 in Microtubule Assembly. <i>By</i> G. S. BLANK, M. B. YAFFE, J. SZASZ, E. GEORGE, T. L. ROSENBERRY, and H. STERNLICHT	467
Studies on the Exchangeable Nucleotide Binding Site of Tubulin. <i>By</i> J. P. NATH, G. R. EAGLE, and R. H. HIMES	482
Involvement of Guanosine Triphosphate (GTP) Hydrolysis in the Mechanism of Tubulin Polymerization: Regulation of Microtubule Dynamics at Steady State by a GTP Cap. <i>By</i> D. PANTALONI and M-F. CARLIER	496
Location of the Guanosine Triphosphate (GTP) Hydrolysis Site in Microtubules. <i>By</i> M. CAPLOW.....	510
Several Metabolic Factors Governing the Dynamics of Microtubule Assembly and Disassembly. <i>By</i> S-H. LEE, G. FLYNN, P. S. YAMAUCHI, and D. L. PURICH	519
Mechanism of Assembly of Sea Urchin Egg Tubulin. <i>By</i> H. W. DETRICH III and M. A. JORDAN.....	529
Kinetic and Steady State Analysis of Microtubule Assembly. <i>By</i> R. C. WEISENBERG	543
Nucleation of Microtubule Assembly: Experimental Kinetics, Computer Fitting of Models, and Observations on Tubulin Rings. <i>By</i> H. P. ERICKSON and W. A. VOTER	552
Dynamics of Tubulin and Calmodulin in the Mammalian Mitotic Spindle. <i>By</i> J. R. MCINTOSH, W. M. SAXTON, D. L. STEMPLE, R. J. LESLIE, and M. J. WELSH	566
Microtubule Dynamics in Mitotic Spindles of Living Cells. <i>By</i> P. WADSWORTH and E. D. SALMON	580
Control of Microtubule Assembly-Disassembly in Lysed-Cell Models. <i>By</i> W. J. DEERY	593
Contribution of Microtubules to Cellular Physiology: Microinjection of Well-Characterized Monoclonal Antibodies into Cultured Cells. <i>By</i> J. WEHLAND, H. C. SCHRÖDER, and K. WEBER	609
Purification of Tubulin by Fast-Performance Liquid Chromatography. <i>By</i> F. GASKIN and S. ROYCHOWDHURY	622
Hydrophobic Interactions of Tubulin. <i>By</i> J. M. ANDREU	626
An Analysis of Tubulin Molecular Weight by Equilibrium Chromatography: Further Evidence for Tubulin Oligomers. <i>By</i> N. G. KRAVIT and R. D. BERLIN	631
Dideoxyguanosine Nucleotides and Microtubule Assembly. <i>By</i> E. HAMEL and C. M. LIN.....	635
The GTP Concentration Modulates the Association Rate Constant for Microtubule Assembly. <i>By</i> K. ISLAM and R. G. BURNS.....	639

The Carboxyterminal Region of Tubulin Regulates Its Assembly into Microtubules. <i>By</i> L. SERRANO, R. B. MACCIONI, and J. AVILA.....	642
Tubulin Domain Structure Studied by Limited Proteolysis and Antibody Labeling. <i>By</i> E.-M. MANDELKOW, M. HERRMANN, and U. RÜHL	645
Microtubule Assembly and Disassembly Studied by Synchrotron X-Ray Scattering and Cryoelectron Microscopy. <i>By</i> E. MANDELKOW, E.-M. MANDELKOW, and J. BORDAS.....	650
ATP-Dependent Gelation Contraction of Microtubules <i>in Vitro</i> . <i>By</i> C. CIANCI, D. GRAFF, B. GAO, and R. C. WEISENBERG.....	656
Segregation of an Antigenically Unique Subset of Alpha-Tubulin Subunits into Cold-Stable Microtubules during <i>in Vitro</i> Microtubule Assembly. <i>By</i> W. C. THOMPSON	660
Direct Visualization of Steady State Microtubule Dynamics <i>in Vitro</i> . <i>By</i> D. KRISTOFFERSON, T. MITCHISON, and M. KIRSCHNER	664
Microtubule-Dependent Intracellular Motility Investigated with Nanometer Particle Video Ultramicroscopy (Nanovid Ultramicroscopy). <i>By</i> M. DE BRABANDER, G. GEUENS, R. NUYDENS, M. MOEREMANS, and J. DE MEY ..	666
Centrosomes Are Required for the Assembly of a Bipolar Spindle in Animal Cells. <i>By</i> G. SLUDER, F. J. MILLER, and C. L. RIEDER	669
Incorporation and Turnover of Labeled Exogenous Tubulin in the Mitotic Spindles of HeLa Cells and <i>Chaetopterus</i> Oocytes. <i>By</i> D. GOODE and V. SARMA.....	674

Part IV. Drugs Affecting Microtubule Assembly

Tubulin-Colchicine Interactions and Polymerization of the Complex. <i>By</i> J. M. ANDREU and S. N. TIMASHEFF	676
Kinetics and Steady State Dynamics of Tubulin Addition and Loss at Opposite Microtubule Ends: The Mechanism of Action of Colchicine. <i>By</i> L. WILSON and K. W. FARRELL.....	690
Kinetic and Thermodynamic Aspects of Tubulin-Ligand Interactions: Binding of the Colchicine Analog 2-Methoxy-5-(2',3',4'-Trimethoxyphenyl) Tropone. <i>By</i> Y. ENGELBORGHs and T. J. FITZGERALD	709
Interactions of Vinblastine and Maytansine with Tubulin. <i>By</i> R. F. LUDUENA, W. H. ANDERSON, V. PRASAD, M. A. JORDAN, K. C. FERRIGNI, M. C. ROACH, P. M. HOROWITZ, D. B. MURPHY, and A. FELLOUS	718
Taxol: Mechanisms of Action and Resistance. <i>By</i> S. B. HORWITZ, L. LOTHSTEIN, J. J. MANFREDI, W. MELLADO, J. PARNES, S. N. ROY, P. B. SCHIFF, L. SORBARA, and R. ZEHEB	733
A Mechanism of Cellular Resistance to Drugs That Interfere with Microtubule Assembly. <i>By</i> F. R. CABRAL, R. C. BRADY, and M. J. SCHIBLER	745
Tubulazole: A New Stereoselective Microtubule Inhibitor. <i>By</i> M. DE BRABANDER, G. GEUENS, R. NUYDENS, R. WILLEBRORDS, M. MOEREMANS, R. VAN GINCKEL, W. DISTELMANS, C. DRAGONETTI, and M. MAREEL.....	757

Drugs with Colchicine-like Effects That Specifically Disassemble Plant but Not Animal Microtubules. <i>By A. S. BAJER and J. MOLÈ-BAJER</i>	767
New Antineoplastic Agents with Antitubulin Activity. <i>By J. K. BATRA, C. M. LIN, E. HAMEL, L. JURD, and L. J. POWERS</i>	785
Molecular Modeling of Microtubule Inhibitors and the Colchicine Binding Site on Tubulin. <i>By M. N. LIEBMAN</i>	788
The Role of the B-Ring of Colchicine on Taxol-Induced Tubulin Polymerization. <i>By B. BHATTACHARYYA, G. GHOSHCHAUDHURI, S. MAITY, and B. B. BISWAS</i>	791
Regulation of Neuronal Adenylate Cyclase by Microtubule Proteins. <i>By M. M. RASENICK</i>	794

Part V. Interactions of Microtubules with Other Cytoplasmic Components

Interactions of Microtubules with Neuronal Intermediate Filaments <i>in Vitro</i> . <i>By R. C. WILLIAMS JR.</i>	798
Interaction of Actin Filaments with Microtubules Is Mediated by Microtubule-Associated Proteins and Regulated by Phosphorylation. <i>By S. C. SELDEN, and T. D. POLLARD</i>	803
Isolation of Microtubule-Secretory Granule Complexes from the Anglerfish Endocrine Pancreas. <i>By W. L. DENTLER and K. A. SUPRENANT</i>	813
Membrane Tubulin. <i>By C. S. REGULA, P. R. SAGER, and R. D. BERLIN</i>	832
Association of Microtubules with Membrane Skeletal Proteins. <i>By B. L. FACH, S. F. GRAHAM, and R. A. B. KEATES</i>	843
Membrane Tubulin Receptors in Human Leukemic Cells. <i>By R. W. RUBIN</i>	846
Local Control of the Axonal Cytoskeleton. <i>By S. R. HEIDEMANN, H. C. JOSHI, and R. E. BUXBAUM</i>	847
Modification of Microtubule-Microfilament Interactions during Neurite Outgrowth. <i>By D. A. SPERO, E. T. BROWNING, and F. J. ROISEN</i>	849
Mitochondrial Localization of a Microtubule-Related Protein. <i>By R. S. GUPTA and T. J. VENNER</i>	854

Part VI. Microtubule Function

Microtubule Function in Human Blood Polymorphonuclear Leukocytes: Analysis Through Heat-Induced Lesions. <i>By S. E. MALAWISTA</i>	858
The Function of Microtubules in Directional Cell Movement. <i>By U. EUTENEUER and M. SCHLIWA</i>	867
Role of Microtubules in the Formation of Carotenoid Droplet Aggregate in Goldfish Xanthophores. <i>By T. T. TCHEN, R. D. ALLEN, S-C. J. LO, T. J. LYNCH, R. E. PALAZZO, J. HAYDEN, G. R. WALKER, and J. D. TAYLOR</i>	887
The Cytomatrix Regulates "Resolute" Transport in Erythrophores. <i>By M. E. STEARNS, L. I. BINDER, and M. WANG</i>	895
Microtubules and the Mechanism of Directed Organelle Movement. <i>By B. J. SCHNAPP, R. D. VALE, M. P. SHEETZ, and T. S. REESE</i>	909

Changes in the Extent of Microtubule Assembly Can Regulate Initiation of DNA Synthesis. <i>By</i> D. H. CARNEY, K. L. CROSSIN, R. BALL, G. M. FULLER, T. ALBRECHT, and W. C. THOMPSON	919
Microtubule-Dependent Reticulopodial Surface Motility: Reversible Inhibition on Plasma Membrane Blebs. <i>By</i> S. S. BOWSER and C. L. RIEDER	933
Intracellular Transport in <i>Reticulomyxa</i> . <i>By</i> U. EUTENEUER, K. L. McDONALD, M. P. KOONCE, and M. SCHLIWA	936
Intracellular pH Shift Initiates Microtubule-Mediated Motility during Sea Urchin Fertilization. <i>By</i> G. SCHATTEN, T. BESTOR, R. BALCZON, J. HENSON, and H. SCHATTEN	940
Microtubules in Mouse Oocytes, Zygotes, and Embryos during Fertilization and Early Development: Unusual Configuration and Arrest of Mammalian Fertilization with Microtubule Inhibitors. <i>By</i> G. SCHATTEN, C. SIMERLY, and H. SCHATTEN	945
Automaton Model of Dynamic Organization in Microtubules. <i>By</i> S. R. HAMEROFF, S. A. SMITH, and R. C. WATT	949
Microtubular Screw Symmetry: Packing of Spheres as a Latent Bioinformation Code. <i>By</i> D. L. KORUGA	953
Conference Summary. <i>By</i> B. R. BRINKLEY	956
Index of Contributors	963
Subject Index	967
